

# EWR Munich: Streamlining Processes Across the Board with Innovative ERP Solution

---

EWR Munich is the terminal operator for New Jersey's Newark Liberty International Airport, managing all aspects of the flight passenger's experience from curb to gate. But the company had struggled with balancing books efficiently, so it sought an ERP solution that would streamline operations — and provide the tools necessary to establish a proficient finance department.

Now, EWR Munich can manage every aspect of the business more proficiently than ever before. The enterprise is soaring to new heights, looking to the future with **growth and expansion** in mind.

# Enhancing End-To-End Visibility with SAP® Business ByDesign®

## Before: Challenges and Opportunities

- Outsourced bookkeeping processes proved inefficient and time-consuming
- Numerous disconnected systems being managed by a wide variety of employees
- Invoices backlogged due to manual, slow processes
- Lacked a system to scale alongside future expansion plans
- Data required integration into separate system when sent to parent company HQ

## Why SAP and Phoenix Business Consulting?

- SAP Business ByDesign tools and support help to future-proof company
- Smooth and straightforward SAP S/4HANA transition capability when ready
- Customizable, allowing implementation of modular units
- Designed for small and mid-sized businesses

## After: Value-Driven Results

- Enhanced invoice tracking at all stages of the process
- Streamlined management of company goals for diversity and equity
- One centralized hub for company data, across all departments
- Vendor management tool makes all vendor data easily accessible
- Fully streamlined processes creating better employee experience across the board

“Know your processes — and be able to explain them well to the implementation team. The more detailed your description, the better. It’s important to **trust the team** implementing your SAP solution.”

JP Tabet, Managing Director, EWR Munich
